**Issue No. 01, Apr 2022**

On November 28th and 29th 2021, the Eighth Ministerial Conference of the Forum of China-Africa Cooperation (FOCAC), took place in Dakar, Senegal. Ministers from 54 African countries that have established diplomatic relations with China, the African Union and other international organizations participated in the two-day forum. During the closing ceremony, Chinese President Xi Jinping announced that China would join African Union’s plan to vaccinate 60% of African population by 2023 by providing 1 billion doses of Chinese COVID19 vaccines. The 2021 conference also marked the 20th anniversary of the FOCAC. So what is the FOCAC? Does it have an agenda in agricultural development in Africa?

**Section 1: FOCAC III**

On October 10th 2020, the first Ministerial Conference of Forum on China-Africa Cooperation (FOCAC) was held in Beijing, by suggestions from several African foreign ministers, more than 60 ministers from China and 44 African countries, representatives of 17 international and regional organizations and hundreds of Chinese and African business people attended the Conference. Currently, members of FOCAC include China, 54 African countries that have established diplomatic relations with China, and the African (5 regional), sub-regional organizations, such as ECOWAS and EAC, are regularly invited to join the forum as well.

FOCAC is not only focusing on diplomatic issues. In the past two decades, FOCAC gradually evolves into a comprehensive platform for Africa-China cooperation on multi-dimensional issues. So far there are 15 sub-forums under the FOCAC covering varied issues from agriculture to security cooperation. AGRA joined the agriculture sub-forum in 2006; the poverty reduction sub-forum and think tank sub-forum in 2020.

FOCAC is not just a series of meetings. FOCAC takes place every 3 years in China and one African country in turn. Since the 1st FOCAC, follow-up action committees have been formed on both sides, which are in charge of overseeing the implementation of the action plan from the last meeting and preparation for the next meeting. 33 ministries join the FOCAC follow-up committees on the China side and its secretariat sits in the Ministry of Foreign Affairs.

**Big Numbers from FOCAC**

FOCAC takes headlines of global media for its lag financial commitment for Africa (for the next 5 years) that China announces on the forum: 60 billion on the 2018 and 48 billion on the 2020 summit. In the past 20 years since the 1st FOCAC, China has gradually become the biggest bilateral finance provider for African countries with 81 billion official finance disbursed. Away from finance, there are other numbers might be of more significance.

For instance, China is the biggest trading partner for Africa since 2009 with a trade volume around 200 billion in 2020 and 250 billion in 2021. China is the 4th biggest investor for Africa with accumulated FDI close to 50 billion with 25% annual growth since 2003. Besides, Chinese companies constructed over 20 ports, 60 mega power plants, 130 public health facilities, 170 schools and 6,000 km roads and railways respectively in Africa.

**Section 2: FOCAC and Agriculture**

The importance of nutritious rice cultivation between Africa and China has been acknowledged in the joint statement since the 1st FOCAC.
meeting in 2000. And from the 2nd FOCAC onwards, agriculture has been a key issue under the “economic development” sections of the FOCAC Ministerial Conference Action Plans with specific supporting policies and measures. Highlights of decisions regarding agricultural cooperation at FOCAC Conferences throughout the two decades are as follows:

FOCAC 1 (2000) – Beijing

• Approved to advance avenues of bilateral cooperation between China, African countries, and international institutions such as the FAO.

FOCAC 2 (2001) – Addis Ababa

• For the 1st time, China pledged to support Chinese agriculture enterprises to do cooperative projects in Africa with concessional finances.

FOCAC 3 (2002) – Beijing

• For the 1st time, 10 Agricultural Technology Development Centers would be set up in Africa, which were then expanded into 24 over 20 countries until now.
• Send 100 senior experts on agricultural technologies to Africa.
• Beijing Action Plan 2002–2007 encouraged Chinese companies to invest in Africa’s agriculture sector, along with other emphasis on infrastructure, machinery and processing industry in agriculture.

FOCAC 4 (2003) – Sharm el Cheikh

• For the 1st time, “agriculture development and food security” are the priority for both sides.
• Send 10 agricultural technology teams to Africa.
• Help train 1000 agricultural technicians for African countries.

FOCAC 5 (2004) – Beijing

• For the 1st time, encourage Chinese financial institutions to support cooperation between Chinese and African companies in agricultural planting, processing of agricultural products, animal husbandry, fishery and aquaculture.

FOCAC 6 (2006) – Johannesburg

• For the 1st time, modern agriculture is listed among the “10 Cooperation Projects”.
• Establish “R&D” cooperative mechanism among Africa-China agro-science research institutions.

FOCAC 7 (2008) – Beijing

• Help Africa achieving general food security by 2020.
• Implement 10 agricultural assistance programs.
• Send 100 senior agricultural experts to Africa.
• Assist in the development of new research thrusts in the crops, including molecular detection and identification of plant diseases, pest risk analysis, seed health testing/certification, and management of quarantine containment facilities for high-risk materials with biosecurity levels.
• Set up a China’s Agriculture Cooperation Commission.
• Hold Africa-China Agriculture Cooperation Forum regularly.

FOCAC 8 (2011) – Doha

• Extend agricultural cooperation to include the whole industry chain.
• Support Africa in developing modern agriculture by forming a complete system of breeding, planting, processing, storage, and logistics, and developing traditional industries of livestock breeding and cash crop.
• Enhance food security capabilities of African countries, and improve safety and value-added of African agricultural products and food.
• Comprehensively advancing climate cooperation.

SECTION 3: FOCAC Commitments and CAADP

FOCAC Action Plans have pledged to support its implementation since FOCAC 5, and all four priority areas of CAADP are covered by FOCAC commitments.

• Priority 1: Enhancing the Area Under Sustainable Land Management and Irriable Water Control Systems.
• Priority 2: Improving Food Infrastructure and Trade-Related Capacities for Market Access.
• Priority 3: Increasing Food Supply, Reducing Hunger, and Improving Readiness to Food Emergency Crises.
• Priority 4: Improving Agriculture Research, Technology Dissemination, and Adoption.

Conclusion:

Over two decades, the Forum on China Africa Cooperation has become the main platform for multi-dimensional cooperation between the two sides. Gradually, follow-up institutions under the FOCAC have also been established. On China side, although the significance of agriculture has been acknowledged since the 1st forum, but never provided with substantial support like other sectors (manufacturing and infrastructures for example) until the 2009 summit, when the topic started to associate with food security in the forum’s agenda. On Africa side, a lot of improvement has been made, but lack of better-coordinated stands and actions when negotiating with China still impede the relation, especially over issues such as agriculture.

Since China become the largest importer of food internationally in 2016 and the 2nd largest importer of African agriculture products in 2021, it is obviously crucial for African stakeholders, such as AGRA, to carefully monitor and react China’s policy in the agriculture sector. The China Agriculture Policy Digest plans to serve this purpose.
